The Junior group of the Bilingual Children's Education Project functions with four members aged 6-10 and three teachers. The group and teachers have an established operating pattern: meeting once a week, Tuesday 5-6.30pm.

**Facilities, Equipment, Funding:** For the past several years, the Bilingual Kids group has received the institutional and financial support from the educational institute. We report on our activities should be submitted to the institute journal and we hope to continue to receive support. The materials shelf continues in IERS Archives office.

**Demographics and Membership:** Our assumption as a group is that only bilingual families will be considered for membership. If a member would like to suggest a new student and family join our group, he or she should propose it to the appropriate group (junior or senior) for approval at a meeting. A special meeting is called for this purpose. The classes are part of an ICU research project and that ICU presence is necessary. Expansion is a natural progression but this is highly dependent upon circumstances of the existing members. The children progress well. It is clear that we need to consider acceptable and optimum class size, to consider the future of the classes separately and the project as a whole to set out possible tracks for the future.
