2. Description

The database ICULD-0006 contains recordings of Drenjongke voiceless nasals produced by four speakers in November 2018 and six speakers in March 2019. All recordings were made on a TASCAM DR-100 MK-III recorder and a Shure WH-30 Headworn microphone in Gangtok, Sikkim. Drenjongke language is a Trans-Himalayan language of the Bodish subgroup spoken in Sikkim. The language is also called Lhoke, Bhutia or Sikkimese. There are an estimated 80,000 speakers of Sikkimese Bhutia, Lhoke or Drenjongke. Based on negligible phonetic differences, real differences in the form of several morphological desinences and some lexical differences, Drenjongke can be divided into eastern, southern, northern and western dialects.
