Foreword

The 22nd volume of the International Christian University Working Papers in Linguistics (ICUWPL) is a collection of Zapotec data compiled from eight sources on various dialects of Zapotec. The project was led by Julián Villegas and Seunghun J. Lee, and the data was organized by Yukki Baldoria, B. Paris Fleming, and Mei Wan Rachel Liu. This WPL offers four chapters to facilitate data comparison. The first chapter includes the introduction about this project, short descriptions of each source that was used as a reference, as well as the number of tokens in each source. Chapters 2 to 4 are sorted according to Zapotec IPA alphabetical order, English gloss alphabetical order, and Spanish gloss alphabetical order respectively. A link to the online archive with access instructions where the Excel file of the of the data sorted according to archive ID can be found.

The creation of this volume was funded by JSPS Kakenhi grant #20K1196. This volume is also supported by the ILCAA joint research project “Phonetic typology from cross-linguistic perspectives (PhonTyp)” (2021-2023). ICUWPL is sponsored by ICU Linguistics.
